Question 1)

a) Insert D, I, J, K, S, T, R, A to an empty 2-3 tree, and then delete S and I in given order.

delete

S

I

b) Insert V, I, N, T, C, E, R, F to an empty 2-3-4 tree and then delete T and N.

delete

c) what is the maximum number of keys that a 2-3 tree of height  $h$  can hold?

1 node	$3-1$ keys at level 1
3 nodes	$3 * (3-1)$ keys at level 2
9 nodes	$3 * 3 * (3-1)$ keys at level 3
$\vdots$	
$3^{(h-1)}$	$3^{(h-1)} * (3-1)$ keys at level $h$

---

$3^h - 1$	keys maximum total number of keys that a 2-3 tree of height $h$ can hold.
